

Exercise 2

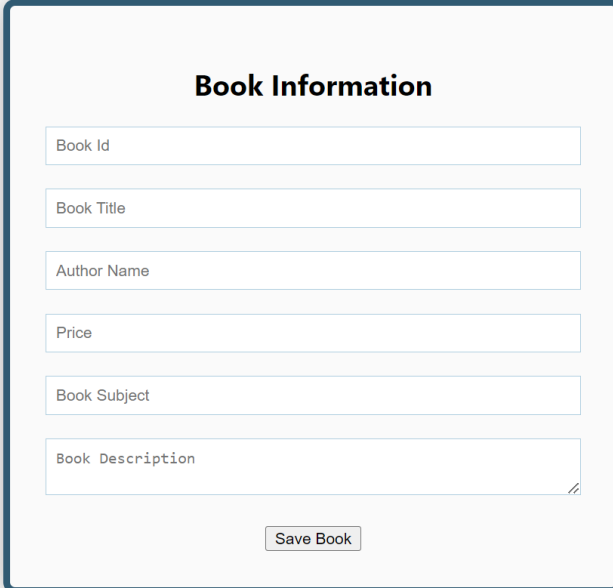

React Frontend Development

Task 1 – Make a Component

1. Create a new React application named "exercise2".
2. Within the "src" directory, make a "components" folder and proceed to create a React component, "BooksForm", inside it.
3. Ensure that the "BooksForm" component is configured to render the specified user interface (UI).
4. Implement the styles for the "BooksForm" by referencing the "BooksForm.css" stylesheet.

Task 2 – Import the Component into the App

5. Modify your App.js file to include an import statement for the BooksForm component to render the user interface (UI).
