

Exercise 5

React Hook

Task 1 – Make a Component

1. Create a new react app: **exercise5** on Desktop.
2. Create a folder **components** inside the **src** folder. And then create a React component **EmployeePayroll** inside the components folder.
3. The component **EmployeePayroll** has the following input screen to accept employee name and basic salary and find the bonus and Net salary. The bonus is 5% of basic salary if the basic salary is up to 1000 rials. Otherwise, 10% of basic salary. The sample screen layout is shown below. The net salary is calculated by the following formula.

$$\text{Net Salary} = \text{Basic Salary} + \text{Bonus}$$

4. Use **EmployeePayroll.css** to apply the styles for forms and table.

Task 2 – Import the Component in App

5. Update your App.js to import the **EmployeePayroll** component to the show.

Task 3

6. Upload only the **src** folder in the link provided in Moodle.

Employee Payroll Calculation

Name:	Ali
Basic Salary	2000
Bonus:	200
Net Salary	2200
